Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	Gesehen am 20.04.2020
Sommario/riassunto	The Annual Report on the EU Blue Economy aims to describe the scope and size of the blue economy in the European Union, creating a baseline to support policymakers and stakeholders in the quest for sustainable development of oceans, seas and coastal resources. It will monitor developments in the EU blue economy annually and examine the drivers behind trends. The report examines not only established sectors (meaning, for the purposes of this report, those that have traditionally contributed to the blue economy) but also emerging and innovative sectors, which bring new opportunities for investment and hold huge potential for future development. It describes the most recent trends in several socioeconomic indicators and analyses the drivers behind such trends. Analyses are provided for the EU as a whole and by sector and industry for each Member State. Reflecting the availability of comparable datasets across all Member States, the focus of this first report is primarily on the established sectors. While there are still many challenges to be met, this report aims to serve as a first step to assessing the drivers and potential for oceans and coasts to provide for sustainable economic growth and to support the

development of management policies that will ensure that growth is sustainable.
