

1. Record Nr.	UNINA9910895631103321
Titolo	OECD Guidelines for the Testing of Chemicals, Section 1 : Physical-Chemical properties / / Organisation for Economic Co-operation and Development
Pubbl/distr/stampa	Paris, : OECD Publishing Paris : , : OECD Publishing, , 1981
ISSN	2074-5753
Descrizione fisica	1 online resource
Disciplina	543.01
Soggetti	Chemical tests and reagents
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Sommario/riassunto	The OECD Guidelines for the Testing of Chemicals is a collection of about 150 of the most relevant internationally agreed testing methods used by government, industry and independent laboratories to identify and characterise potential hazards of chemicals. They are a set of tools for professionals, used primarily in regulatory safety testing and subsequent chemical and chemical product notification, chemical registration and in chemical evaluation. They can also be used for the selection and ranking of candidate chemicals during the development of new chemicals and products and in toxicology research. This group of tests covers physical-chemical properties.
