1. Record Nr.   UNINA9910895798303321

   Titolo   Journal of numerical mathematics and stochastics

   Pubbl/distr/stampa   Beirut, Lebanon, : Euclidean Press, LLC

   Descrizione fisica   1 online resource

   Disciplina   518.4

   Soggetti   Numerical analysis
                            Stochastic analysis
                            Number theory
                            Periodicals.

   Lingua di pubblicazione Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Periodico

   Sommario/riassunto   Original contributions to numerical mathematics and stochastics, with
                            an emphasis on work and methods with a potential for strengthening
                            the ties between these two disciplines. Computational stochastics is a
                            new and expanding area of research dealing with numerical methods of
                            analyzing complex stochastic models. For this reason, the journal is
                            intended to act as a numerical interface between mathematical sciences
                            and stochastics.
