Beham.

Sommario/riassunto

The focus of volume 14 of the EYIEL is on “(Public) Procurement and Competition Law in European and International Economic Law”. It is testimony to the fact that areas of law originally perceived as purely economic are permeated by the challenges of society today and adapting to these by embracing innovation, promoting sustainability and social responsibility and including new values in their legal constitutions. Thus, the focus section provides a broad spectrum of contributions considering the interaction between (public) procurement law and WTO law, the role of RTAs, the inclusion of sustainability aspects as well as the influence recent development and challenges such as the Covid-19 pandemic and climate change have on public procurement and competition policy. In its general section the EYIEL considers “Current Challenges, Developments and Events in European and International Economic Law”. It provides a cross-section of recent developments touching upon the Next Generation EU, food commodification, new regulatory approaches to geographical indications, the interaction between investment law and human rights as well as the newest developments with regard to Public-Private Partnership Legislation.
