

1. Record Nr.	UNINA9910897983803321
Autore	Ovbiagele Bruce
Titolo	Achieving Equity in Neurological Practice : Principles and Pathways // edited by Bruce Ovbiagele, Sharon Lewis, Daniel José Correa, Reena Thomas, Larry CharlestonIV
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2024
ISBN	3-031-62727-X
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (469 pages)
Altri autori (Persone)	LewisSharon CorreaDaniel José ThomasReena CharlestonIVLarry
Disciplina	616.8008
Soggetti	Neurology Medicine - Practice Hospitals - Administration Race Practice and Hospital Management Race and Ethnicity Studies Malalties del sistema nerviós Malalts Discriminació Llibres electrònics.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Section 1: Principles -- Definitions and Descriptions -- Injustice, discrimination, and devaluation in neurology -- Determinants and Dilemmas -- Section 2: Neurological Conditions -- Cognitive Dysfunction & Neurobehavior -- Health Disparities and Inequities in Epilepsy -- Headache Medicine -- Movement Disorders -- Neurogenetics and Personalized Medicine in Epilepsy -- Neuroinfectious Disease -- Neuroimmunology -- Neuromuscular Disease -- Navigating Neuro-Oncology Care: Addressing Health

Disparities in Access and Outcomes -- Neuro-Ophthalmology --  
Neuro-Rehabilitative Medicine -- Pediatric Neurology -- Sleep Medicine  
-- Stroke and Cerebrovascular Disease -- Traumatic Brain Injury --  
Section 3 Strategic Priorities -- Global Equity in Neurological Practice --  
Training and Education -- Research -- Advocacy and Leadership.

## Sommario/riassunto

Neurological processes and prognoses frequently vary by sex/gender, race/ethnicity, socioeconomic status, and geographic location. In particular, individuals of lower socioeconomic status and from minority racial and ethnic backgrounds have worse neurological health and often receive a lower standard of neurological care. These inequities in neurological outcomes are attributed to wider societal social influences, which impact how people live and how neurology is practiced. This book provides the theoretical background, scientific evidence, and experiential knowledge warranted to properly care for vulnerable, underserved patients with neurological diseases at the levels of the provider and system. The root causes of neurological health inequities are examined across a broad range of topics and offers possible solutions for achieving neurological health equity. In addition, the bigger picture with regard to the pipeline of practitioners and purview of policy makers is discussed. Initial chapters help to frame the overall issue of neurological health equity. Subsequent chapters evaluate neurological health equity from the clinical practice standpoint, with a focus on select populations and subspecialty care delivery settings. *Achieving Equity in Neurologic Practice* is primarily written by neurologists who see patients and have a great understanding of inequities in neurologic care. This is the first book published on neuroequity and its depth makes it a must read for anyone involved in the care of neurologic patients.
