

1.	Record Nr.	UNIORUON00080428
	Autore	COLLISON, Robert Lewis.
	Titolo	Kenya / Robert L. Collison
	Pubbl/distr/stampa	Oxford, : Santa Barbara, : Clio Press, c1982
	ISBN	09-03-45034-8
	Descrizione fisica	xxix, 157 p. ; 23 cm
	Disciplina	016.96762
	Soggetti	KENYA - Bibliografia
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910897991203321
	Autore	Luo Albert C. J.
	Titolo	Two-dimensional Self and Product Cubic Systems, Vol. II : Crossing-linear and Self-quadratic Product Vector Field / / by Albert C. J. Luo
	Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
	ISBN	9783031595745 3031595742
	Edizione	[1st ed. 2024.]
	Descrizione fisica	1 online resource (X, 238 p. 46 illus., 45 illus. in color.)
	Disciplina	003
	Soggetti	Dynamics Nonlinear theories Engineering mathematics Engineering - Data processing Multibody systems Vibration Mechanics, Applied Algebra, Universal Applied Dynamical Systems Mathematical and Computational Engineering Applications Multibody Systems and Mechanical Vibrations General Algebraic Systems

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Self and Product Cubic Systems -- Double-saddles, Third-order Saddle nodes -- Vertical Saddle-node Series and Switching Dynamics -- Saddle-nodes and third-order Saddles Source and Sink -- Simple equilibrium networks and switching dynamics.
Sommario/riassunto	<p>This book is the thirteenth of 15 related monographs on Cubic Dynamical Systems, discusses self- and product-cubic systems with a crossing-linear and self-quadratic products vector field. Equilibrium series with flow singularity are presented and the corresponding switching bifurcations are discussed through up-down saddles, third-order concave-source (sink), and up-down-to-down-up saddles infinite-equilibriums. The author discusses how equilibrium networks with paralleled hyperbolic and hyperbolic-secant flows exist in such cubic systems, and the corresponding switching bifurcations obtained through the inflection-source and sink infinite-equilibriums. In such cubic systems, the appearing bifurcations are: saddle-source (sink) hyperbolic-to-hyperbolic-secant flows double-saddle third-order saddle, sink and source third-order saddle-source (sink) Develops a theory of self and product cubic systems with a crossing-linear and self-quadratic products vector field; Presents equilibrium networks with paralleled hyperbolic and hyperbolic-secant flows with switching by up-down saddles; Shows equilibrium appearing bifurcations of various saddles, sinks, and flows.</p>
