

1. Record Nr.	UNINA9910899890703321
Autore	Bauer Robin
Titolo	Atlas of Palpation / / by Robin Bauer, Sandro Wolfram
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2024
ISBN	3-662-69186-8
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (281 pages)
Altri autori (Persone)	WolframSandro
Disciplina	615.82
Soggetti	Physical therapy Occupational therapy Sports medicine Nursing Physiotherapy Occupational Therapy Sports Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Basics of palpation -- Palpation of bony reference points -- Palpation of the joints -- Palpation of the ligaments -- Palpation of the musculature -- Palpation of the nerves -- Palpation of the vessels.
Sommario/riassunto	This atlas with over 250 illustrations and videos is a modern basic work on palpation for physiotherapists. Members of the medical-therapeutic sector face the daily challenge of having to transfer theoretical knowledge into practice. The Atlas of Palpation addresses this process through its multimedia design. Evidence-based technical texts, the most modern illustrations and practical teaching videos illustrating structures and examination procedures address both students and therapists working in practice. All the essential structures of the body are shown in three-dimensional perspective, so that a basic understanding of interrelationships and movement patterns is conveyed. The palpation grips are explained in an understandable way and described in a comprehensible way. The instructional videos were specially made by the authors and the latest technical equipment in terms of camera, lighting elements and sound ensures the highest

possible quality. The book is clearly divided into different body systems, which include bony, articular, ligamentous, muscular, nervous, and vascular system. A clear subdivision into subheadings makes it possible to quickly find the desired content. The multimedia approach of this book represents a unique selling point in the medical-therapeutic sector in the field of palpation. This new type of "living" book opens up completely new perspectives for readers when using it. Trainees and students will find here an optimal introduction for professional palpation; for already experienced physiotherapists it is an ideal reference book for tricky questions.
