Sommario/riassunto

This book explores the evolving energy relationship between China and Brazil, focusing on the impact of China's involvement in transforming Brazil into a significant oil power following the discovery of the pre-salt oil reserves. The author, Pedro Henrique Batista Barbosa, draws on his academic research and professional experience to provide insights into how these two nations have become intertwined in the global oil market. The book highlights the strategic importance of Brazil's oil reserves to China's energy security and discusses the economic and political implications of this bilateral relationship. It is intended for readers interested in international energy relations, particularly those involving emerging markets.
