Edizione	[1st ed.]
Descrizione fisica	1 online resource (270 pages)
Disciplina	618.92/3427
Soggetti	Diarrhea in children World health
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Underbelly articulates the pathways of global health funding and development policies by exploring their outcomes for recipient individuals and communities. Drawing on 15 years of ethnographic research and global health program implementation in highland Guatemala, this book focuses on the provision of primary health care services as a critical exemplar of how global health and development programs fall short, specifically focusing on efforts to prevent and treat diarrhea"--
