Sommario/riassunto

This open access book brings together researchers from a variety of disciplines to explore science, technology, and innovation cooperation between China and African countries from a variety of perspectives. The growing economic, technological, and scientific cooperation between Africa and China provides opportunities to jointly develop mechanisms to provide a skill base from discovery to invention, innovation, and implementation for the benefit of both parties. This book makes a significant contribution to the understanding of the different dimensions of China-Africa STI cooperation and reaches out to all stakeholders with evidence-based research.
