Sommario/riassunto	This report by the European Investment Bank Group examines investment barriers within the European Union in 2023. It highlights challenges faced by small and medium-sized enterprises, regulatory complexities, and market fragmentation. The report underscores the need for sustainable investment to foster economic growth and address climate change. It discusses specific sectors like forestry and renewable energy, emphasizing the importance of overcoming these barriers to

enhance productivity and innovation. The intended audience includes policymakers, economists, and stakeholders in European economic development.
