Sommario/riassunto	The Kitans established the Liao dynasty in northern China, which lasted for over two centuries (916-1125). In this survey the reader will find what is currently known about the Kitan language and scripts. The language was very likely distantly related to Mongolian, with two quite different scripts in use. A few generations after their state was defeated, almost all trace of the Kitan spoken and written languages disappeared, except a few words in Chinese texts. Over the past few decades, however, inscriptions from the tombs of the Liao emperors and the Kitan aristocracy have been at least partially deciphered, resulting in a significant increase of our knowledge of the Kitan lexicon,

morphology and syntax.

Sommario/riassunto	Child survivors of the Armenian Genocide, jewish child survivors of the Holocaust, non-jewish slavic children, and war children of the Second World War EHS Volume 5 presents child-oriented research approaches by scholars from the fields of Holocaust Studies, Genocide Studies, and Second World War History. The authors highlight key concepts of Childhood Studies, arguing that children are historical actors with their own ideas, identity-forming experiences, and agency. The contributions demonstrate the importance of children`s accounts of war and postwar experiences for deeper understanding of the history of war and society in the twentieth century. The volume showcases a variety of children`s voices including child survivors of the Armenian Genocide, Jewish child survivors of the Holocaust, non-Jewish Slavic children, and war children of the Second World War by utilising testimonies from lesser-known archival and oral history collections. Includes: Edita Gzoyan: Forcibly Transferred and Assimilated: Experiences of Armenian Children during the Armenian Genocide.

Dieter Steinert: Echoes from Hell: Jewish Child Forced Labourers and the Holocaust. Oksana Vynnyk: Surviving Starvation in Soviet Ukraine: Children and Soviet Healthcare in the early 1930s.
