

1. Record Nr.	UNINA9910988180103321
Autore	Krause Paul C.
Titolo	Analysis of electric machinery and drive systems // Paul C. Krause (PC Krause and Associates, Inc., West Lafayette, Indiana, United States), Oleg Wasynczuk (Purdue University, West Lafayette, Indiana, United States), Scott D. Sudhoff (Purdue University, West Lafayette, Indiana, United States), Steven D. Pekarek (Purdue University, West Lafayette, Indiana, United States)
Pubbl/distr/stampa	Newark : , : John Wiley & Sons, Incorporated, , [2025] ©2025
ISBN	9781394293872 1394293879 9781394293896 1394293895 9781394293889 1394293887
Edizione	[Fourth edition]
Descrizione fisica	1 online resource (483 pages)
Collana	IEEE Press Series on Power and Energy Systems Series
Disciplina	621.31/042
Soggetti	Maquinària elèctrica
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- About the Authors -- Preface -- Acknowledgments -- About the Companion Website -- Chapter 1 Introductory Concepts -- 1.1 Introduction -- 1.2 Stationary Magnetically Coupled Circuits -- 1.2.1 Nonlinear Magnetic System -- 1.3 Energy Balance Relationships -- 1.4 Energy in Coupling Field -- 1.5 Electromagnetic Forces -- 1.6 SteadyState and Dynamic Performance of an Electromechanical System -- References -- Problems -- Chapter 2 Symmetrical ThreePhase Stator -- 2.1 Introduction -- 2.2 Stator Winding Configuration and AirGap mmf -- 2.3 Transformation Equations -- 2.4 Voltage Equations in Arbitrary Reference Frame -- 2.4.1 Electric Power -- 2.5 Transformation Between Reference Frames -- 2.6 PPole Machines -- 2.7 Transformation of a Balanced Set -- 2.8 Instantaneous and SteadyState Phasors -- 2.9 Variables Observed from

Several Frames of Reference -- References -- Problems -- Chapter 3
 Symmetrical Induction Machine -- 3.1 Introduction -- 3.2 Induction
 Machine -- 3.3 Transformation of Rotor Windings to the Arbitrary
 Reference Frame -- 3.4 Voltage, FluxLinkage Equations, and
 Equivalent Circuit -- 3.5 Torque Expressed in Arbitrary Reference
 Frame Variables -- 3.6 Computer Simulation in the Arbitrary Reference
 Frame -- 3.7 Per Unit System -- 3.8 SteadyState Equivalent Circuit and
 Common Modes of Operation -- 3.9 FreeAcceleration Torque Versus
 Speed Characteristics -- 3.10 FreeAcceleration Characteristics Viewed
 from Various Reference Frames -- 3.11 Dynamic Performance During
 Sudden Changes in Load Torque -- References -- Problems -- Chapter 4
 Brushless DC Machine -- 4.1 Introduction -- 4.2 Voltage Equations in
 Machine Variables -- 4.3 Voltage and Torque Equations in Rotor
 Reference Frame Variables -- 4.4 Instantaneous and SteadyState
 Phasors -- 4.5 Field Orientation of a Brushless DC Drive.
 4.5.1 Brushless dc Motor Operation with $v \& \text{ equals } 0$ --
 4.5.2 MaximumTorquePerVolt Operation of a Brushless dc Drive
 ($v \& \text{ equals } v_{MT/V}$) -- 4.5.3 MaximumTorquePerAmpere
 Operation of a Brushless dc Drive ($v \& \text{ equals } v_{MT/A}$) --
 References -- Problems -- Chapter 5 Synchronous Machines -- 5.1
 Introduction -- 5.2 Windings of a Synchronous Machine -- 5.3 Voltage
 Equations in Rotor Reference Frame Variables -- 5.4 Torque
 Expressions Positive for Motor Action -- 5.5 TimeDomain Block
 Diagram -- 5.6 Rotor Angle and Angle Between Rotors -- 5.7 Per Unit
 System -- 5.8 Analysis of SteadyState Operation -- 5.9 Stator Currents
 Positive out of Machine-Synchronous Generator Operation -- 5.9.1
 Dynamic Performance during a Sudden Change in Input Torque --
 5.9.2 Dynamic Performance during a ThreePhase Fault at the Machine
 Terminals -- References -- Problems -- Chapter 6 Neglecting Electric
 Transients -- 6.1 Introduction -- 6.2 Neglecting Stator Electric
 Transients -- 6.3 Induction Machine with Stator Transients Neglected
 -- 6.3.1 FreeAcceleration Characteristics -- 6.4 The Synchronous
 Machine with Stator Transients Neglected -- 6.4.1 ThreePhase Fault at
 Machine Terminals -- References -- Problems -- Chapter 7 Machine
 Equations in Operational Impedances and Time Constants -- 7.1
 Introduction -- 7.2 Park's Equations in Operational form -- 7.3
 Operational Impedances and G(P) for a Synchronous Machine with Four
 Rotor Windings -- 7.4 Standard Synchronous Machine Reactances --
 7.5 Standard Synchronous Machine Time Constants -- 7.6 Derived
 Synchronous Machine Time Constants -- 7.7 Parameters from Short
 Circuit Characteristics -- 7.8 Parameters from FrequencyResponse
 Characteristics -- References -- Problems -- Chapter 8 Eigenvalues
 and VoltageBehindReactance Machine Equations -- 8.1 Introduction.
 8.2 Machine Equations to be Linearized -- 8.2.1 Induction Machine --
 8.2.2 Synchronous Machine -- 8.3 Linearization of Machine Equations
 -- 8.3.1 Induction Machine -- 8.3.2 Synchronous Machines -- 8.4
 SmallDisplacement Stability-Eigenvalues -- 8.5 Eigenvalues of Typical
 Induction Machines -- 8.6 Eigenvalues of Typical Synchronous
 Machines -- 8.7 Detailed VoltageBehindReactance Model -- 8.8
 ReducedOrder VoltageBehindReactance Model -- References --
 Problems -- Chapter 9 SemiControlled Bridge Converters -- 9.1
 Introduction -- 9.2 SinglePhase Load Commutated Converter -- 9.3
 ThreePhase Load Commutated Converter -- 9.4 Conclusions and
 Extensions -- References -- Problems -- Chapter 10 Fully Controlled
 ThreePhase Bridge Converters -- 10.1 Introduction -- 10.2 The Three
 Phase Bridge Converter -- 10.3 SixStep Operation -- 10.4 SixStep
 Modulation -- 10.5 SineTriangle Modulation -- 10.6 Extended Sine
 Triangle Modulation -- 10.7 SpaceVector Modulation -- 10.8

Hysteresis Modulation -- 10.9 Delta Modulation -- 10.10 OpenLoop Voltage and Current Regulation -- 10.11 ClosedLoop Voltage and Current Regulation -- References -- Problems -- Chapter 11 Direct Current Machine and Drive -- 11.1 Introduction -- 11.2 Commutation -- 11.3 Voltage and Torque Equations -- 11.4 PermanentMagnet dc Machine -- 11.5 dc Drive -- 11.5.1 AverageValue TimeDomain Block Diagram -- 11.5.2 Torque Control -- Reference -- Problems -- Chapter 12 Torque Control of PermanentMagnet and Synchronous Reluctance Machines -- 12.1 Introduction -- 12.2 Torque Control of a PermanentMagnet AC Machine -- 12.2.1 Maximum SteadyState Torque Versus Speed -- 12.3 Simulation of a PermanentMagnet AC Machine with Torque Control -- 12.3.1 Electrical Dynamics -- 12.3.2 Mechanical Dynamics -- 12.3.3 SystemLevel Simulation Block Diagram -- 12.3.4 System Studies. 12.3.5 ReducedOrder Simulation -- 12.4 Torque Control of a Synchronous Reluctance Machine -- References -- Problems -- Chapter 13 Induction Motor Drives -- 13.1 Introduction -- 13.2 Volts PerHertz Control -- 13.3 Constant Slip Current Control -- 13.4 Field Oriented Control -- 13.5 Direct FieldOriented Control -- 13.6 Robust Direct FieldOriented Control -- 13.7 Indirect Rotor FieldOriented Control -- 13.8 Direct Torque Control -- 13.9 Slip Energy Recovery Drives -- 13.10 Conclusions -- References -- Problems -- Chapter 14 PermanentMagnet AC Motor Drives -- 14.1 Introduction -- 14.2 VoltageSource Inverter Drives -- 14.3 Equivalence of VoltageSource Inverters to an Idealized Source -- 14.4 AverageValue Analysis of VoltageSource Inverter Drives -- 14.5 SteadyState Performance of VoltageSource Inverter Drives -- 14.6 Transient and Dynamic Performance of VoltageSource Inverter Drives -- 14.7 Case Study: VoltageSource InverterBased Speed Control -- 14.8 CurrentRegulated Inverter Drives -- 14.9 Voltage Limitations of CurrentRegulated Inverter Drives -- 14.10 Current Command Synthesis -- 14.11 AverageValue Modeling of CurrentRegulated Inverter Drives -- 14.12 Case Study: CurrentRegulated InverterBased Speed Controller -- References -- Problems -- Appendix A Abbreviations, Constants, Conversions, and Identities -- Appendix B Phasors and Phasor Diagrams -- Index -- EULA.

2. Record Nr.	UNINA9910908298003321
Autore	Reiche, Reimut
Titolo	Sexualitat und Klassenkampf / Reimut Reiche
Pubbl/distr/stampa	New York ; Washington, : Praeger, 1971
Descrizione fisica	169 p. ; 15 cm
Locazione	FLFBC
Collocazione	DAM A15 REIW 03
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
