Sommario/riassunto	This book tries to root its exploration of China's urbanization in the very local realities of China from the perspective of urban geography and international urbanization theory. The research is of large scale, full process and boasts the feature of multidimensional and systematic thinking. In order clearly illustrate the full dimensions of China's

urbanization, each chapter presents series of well-designed figures and tables to enhance the book's readability and clarity. This book can be used as a reference for scholars and decision makers who are engaged or interested in China's urbanization policy, urban and regional planning, and socioeconomic transformation. .
