

1. Record Nr.	UNINA9910908376203321
Titolo	Ethnobotany of Northern Africa and Levant // edited by Rainer W. Bussmann, Mostafa Elachouri, Zaal Kikvidze
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031431050 3031431057
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (1494 illus., 506 illus. in color. eReference.)
Collana	Ethnobotany of Mountain Regions, , 2523-7497
Disciplina	571.32
Soggetti	Plant anatomy Plants - Development Plant ecology Plant propagation Plant physiology Plants - Reproduction Plant Anatomy and Morphology Plant Development Plant Ecology Plant Domestication Plant Physiology Plant Reproduction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Country Profiles -- Northern Africa and Levant The Region -- Profile of Ethnobotanical Studies in Algeria, Since the Beginning (1990) -- Three Decades of Ethnobotany in Morocco (From 1991 to 2021) -- A Review on Ethnobotany in Egypt -- etc -- Plant Profiles -- Acacia cyclops -- Adenocarpus bacquei -- Adiantum capillus-veneris -- Agave americana -- etc.
Sommario/riassunto	Research in recent years has increasingly shifted away from purely academic research, and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It has by now widely been recognized that “traditional” knowledge is

always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the world's mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this dynamic content. The field (and thus the market) of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise, attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly. Various societies of such professionals include the Society for Economic Botany, the International Society of Ethnopharmacology, the Society of Ethnobiology, the International Society for Ethnobiology, and many regional and national societies in the field that currently have thousands of members. Growth has been most robust in BRIC countries. The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research. We anticipate including the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants for each region. Each contribution will be scientifically rigorous and contribute to the overall field of study.
