Sommario/riassunto	<p>Repository. 49 Methods and Assignments for Writing Urban Places' offers a set of methods and assignments intended to stimulate new approaches in architecture, urban studies, and other fields of spatial development and to invite creative, often embodied, and sometimes playful engagements with the material and immaterial dimensions of urban places. This 'Repository' collects 49 methods, defined here as systematic procedures, techniques and ways of acting, to explore, examine and discover urban places. Each method is described in a brief text and followed by a direct short assignment. Presented as a clear set of instructions, the assignment encourages and guides the reader to fully or partially explore and employ the method. As such, this Repository is intended to stay off the shelves and be a useful tool to inspire, accompany, and assist spatial professionals, researchers, students and communities alike to engage with urban places and to discover and develop responsible approaches to current urban challenges.00The Repository is a follow-up of the 'Vademecum: 77 Minor Terms for Writing Urban Places' and was compiled by an interdisciplinary group of international scholars connected through the EU COST Action network Writing Urban Places: New Narratives of the European City.</p>
