Sommario/riassunto	"In <i>Rachel Carson and Her Sisters</i> , Musil fills the gap by placing Carson's achievements in a wider context, weaving connections from the past through the present. Readers will find new insight into Carson and contemporary figures she influenced...who have historically received less attention. Musil's respect and enthusiasm for these women is evident throughout the book, making it a deeply engaging and enjoyable read. A valuable addition to scholarship on Rachel Carson, female environmentalists, and the American environmental

movement in general. Highly recommended. All academic and general readers." -Choice "This is a long overdue book, giving great credit to the long line of women who have done so much to shape our culture's view of the world around us and of our prospects in it. We desperately need that culture to heed their words!" -Bill McKibben, author *Oil and Honey: The Education of an Unlikely Activist* "A vibrant, engaging account of the women who preceded and followed Rachel Carson's efforts to promote environmental and human health. In exquisite detail, Musil narrates the brilliant careers and efforts of pioneering women from the 1850's onward to preserve nature and maintain a healthy environment. Anyone interested in women naturalists, activists, and feminist environmental history will welcome this compelling, beautifully-written book." -Carolyn Merchant, author of *The Death of Nature* and professor of environmental history, philosophy, and ethics, University of California, Berkeley. "Bob Musil brilliantly documents the rich trajectory of women's intellectual and political influence, not just on environmentalism but on public policy and activism. Musil offers fascinating details of Rachel Carson's struggles to be taken seriously as a scientist and unearths the stories of the women-unsung heroes all-who influenced her. A must read for anyone interested in American history, science and environmental politics." -Heather White, Executive Director, the Environmental Working Group "Musil uses the life and writings of Rachel Carson as an exemplar of women's participation in the American environmental movement. He places Carson's achievements in contexts by illuminating...the lives of trailblazing female scientists who inspired her and for whom she, in turn, paved the way. Extremely well-researched." -Foreword Reviews

Sommario/riassunto

This book is one of two volumes that examines the role of political communication, media and language in transforming politics, governance and democracy in sub-Saharan Africa. Interdisciplinary in approach, this second volume analyses themes including political advertising and rhetoric, activism, populism, fake news, and political violence. Combining theoretical work with individual case studies on countries including Tanzania, South Africa, Zimbabwe, Nigeria and Ghana, the book highlights the important connection between political communication and governance, and the ways in which language reforms can help to overcome challenges related to public administration. It will appeal to all those interested in public policy, public administration, governance, and political communication, as well as linguistics, media studies and African politics. Isaac Mhute is Associate Professor in the Department of Language, Literature and Culture Studies, Midlands State University, Zimbabwe. Esther Mavengano is Lecturer in the Department of English and Media Studies, Great Zimbabwe University, Zimbabwe.
