Sommario/riassunto	World Development Indicators, the World Bank's respected statistical publication presents the most current and accurate information on global development on both a national level and aggregated globally. This information allows readers to monitor the progress made toward meeting the goals endorsed by the United Nations and its member countries, the World Bank, and a host of partner organizations in September 2001 in their Millennium Development Goals. The 400-page print edition of World Development Indicators 2004 allows you to consult over 80 tables and over 800 indicators for 152 economies and 14 country groups, as well as basic indicators for a further 55 economies. There are key indicators for the latest year available, important regional data, and income group analysis. The report contains six thematic presentations of analytical commentary covering: World View, People, Environment, Economy, States and Markets, and Global Links. The CD-ROM editions contain 40 years of time series data for more than 200 countries from 1960-2002, single-year observations, and spreadsheets on many topics. It contains more than 1,000 country tables and the text from the World Development

Indicators 2004 print edition and the World Bank Atlas 2003. The Windows based format permits users to search for and retrieve data in spreadsheet form, create maps and charts, and fully download them into other popular software programs for study or presentation purposes.

Sommario/riassunto	This study about David Livingstone is different from all other publications about him. Here, Livingstone is not the main topic of interest; the focus of the author is on nutrition and health in pre-colonial Africa and Livingstone is his key informant. David Livingstone

and the Myth of African Poverty and Disease is an unusual book. After a close examination of Livingstone's writings and comparative reading of contemporary authors, Sjoerd Rijpma has been able to draw cautious conclusions about the relatively favourable conditions of health and nutrition in southern and central Africa during the pre-colonial period. His findings shed new light on the medical history of Sub-Saharan Africa. The surprise awaiting travellers in and also before 19th century Africa was that the inhabitants of the interior, even the 'slaves', were healthier and better fed than many of their contemporaries in Europe's Industrial Revolution. "An impressive piece of scholarship, truly forensic in its close reading and re-reading of Livingstone's published works and those of other travellers during the same era, clearly a labour of love which has taken years to complete" (Joanna Lewis).
