Livello bibliografico	Monografia
Sommario/riassunto	<p>This book by Michel Innocent Peya focuses on the Congo Basin, a vital ecological reserve and its global importance. It explores the natural wealth, mysteries, and legal frameworks protecting the region. Highlighting President Denis Sassou N'Gueso's environmental advocacy, the book underscores his leadership in climate diplomacy and sustainable development. The Congo Basin's peatlands are emphasized as crucial carbon reserves, making their protection essential for ecological stability. The book serves as a reference for understanding the region's legal and natural dynamics, while advocating for the inclusion of local communities in sustainable projects. It targets policymakers, environmentalists, and global stakeholders invested in ecological preservation.</p>
