| Sommario/riassunto | This book delves into the Advaita Vednta, the highest metaphysical doctrine of the Hindu tradition, as articulated by akrcrya and perpetuated to the present day. Authored by Svm Satchidnandendra Sarasvat, a prominent contemporary representative of this school, the work defends the authentic teachings of akrcrya against historical distortions. It presents the doctrine as an inner quest for realizing the identity between the Self and the Supreme Principle, Brahman. The book offers Western readers an explicit introduction to the methods leading to this realization, accompanied by detailed notes and commentary by Gian Giuseppe Filippi, an expert in Hind literature and Indology. This scholarly work is intended for those interested in understanding the profound philosophies of Vednta and is a valuable resource for seekers of Truth. |
