Sommario/riassunto	"This book strives to deal with Hegel's thought by means of a thorough, unitarian and logical approach and to enforce the idea that philosophy is rigorous as far as it is able to consistently tackle the question of self-consciousness. It results that the logic underlying every philosophical interest traces back to the self-referring investigation about life in the mode of self-consciousness, by which social practices and their history can be grasped. Once we assess that self-consciousness is life through the concept, we would be able to realize the logical structure underlying its historical outcomes"--
