

1. Record Nr.	UNINA9910915776403321
Autore	Peya Michel Innocent
Titolo	Le désastre écologique et Sanitaire de la COVID-19 : L'humanité à l'épreuve des Crises Multidimensionnelles
Pubbl/distr/stampa	Paris : , : Editions L'Harmattan, , 2020 ©2020
ISBN	2-14-015179-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (267 pages)
Soggetti	Environmental degradation Ecology
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Michel Innocent Peya's book, 'Le Désastre Écologique et Sanitaire de la Covid-19,' explores the interconnected crises of ecology and health exacerbated by the COVID-19 pandemic. The author argues that environmental degradation, such as climate change, pollution, and biodiversity loss, has led to the pandemic and subsequent economic and social upheavals. Peya emphasizes that the ecological crisis has disrupted the global ecosystem, threatening human existence and stability. He identifies two primary ecological challenges: resource scarcity and the biosphere's capacity limits. The book highlights the need for global cooperation to address these issues and prevent future crises. Aimed at scholars, policymakers, and environmentalists, it stresses the imperative of ecological balance for sustainable development.
