CHAPTER 8: THE ROLE OF MATURITY, EXECUTIVE FUNCTIONING, AND SOCIAL UNDERSTANDING IN COMMUNICATION

-- The Complexity of
Social Understanding -- Social Understanding and Language --
Language as a Cognitive Niche and Psychological Tool -- Private and
Inner Speech -- Cognitive Flexibility and Communication -- Cognitive

Processes and Distortions -- Relational Frame Theory -- Relational Frame Theory and the Lang Fear Network -- Cognitive Therapies -- Generic Versus Nongeneric Language -- Self-Disclosure and Attributions -- Summary -- References -- CHAPTER 9: SYSTEMS RESILIENCE -- Resilience and Survivability -- What Makes a System Resilient? -- Passive and Active Resilience -- Protection -- Rupture, Repair, and Flexible Responsiveness -- Assets -- Quality Attributes of Resilience -- Guiding Principles for Resilient Systems -- Chapter Summary -- Book Summary -- References -- INDEX.

Sommario/riassunto

This book explores the biomechanics of human communication, focusing on how systems thinking and feedback mechanisms influence communication processes. It examines the development of the human brain in relation to attachment experiences and discusses the role of feedback in regulating nervous systems. The book delves into the unconscious filters that bias communication, the mechanics of communication signals, and the connection between voice and heart in communication. It emphasizes communication as a behavioral transmitter and energy optimizer, highlighting the impact of social synchronization and nonverbal elements on communication abilities. The book targets researchers, educators, and students interested in communication, psychology, and neuroscience.
