Sommario/riassunto

Contending Global Apartheid: Transversal Solidarities and Politics of Possibility offers a collection of critical essays on human rights movements, sanctuary spaces, and the emplacement of antiracist conviviality in cities across North and South America, Europe and Africa. Contending Global Apartheid: Transversal Solidarities and Politics of Possibility spells out a plea for utopia in a crisis-ridden 21st century of unequal development, exclusionary citizenship, and forced migrations. The volume offers a collection of critical essays on human rights movements, sanctuary spaces, and the emplacement of antiracist conviviality in cities across North and South America, Europe, and Africa. They proceed from the idea that cities may accommodate both a humanistic sensibility and a radical potential for social transformation. The figure of the 'migrant' is pivotal. It expounds the prospect of transversal solidarity to capture a plurality of commonalities and to abjure dichotomies between in-group and out-group, the national and the international, or society and institutions.
