

1. Record Nr.	UNISA996207327003316
Titolo	Aquatic microbial ecology
Pubbl/distr/stampa	Oldendorf/Luhe, Germany, : Inter-Research
ISSN	1616-1564
Disciplina	577.6
Soggetti	Water - Microbiology Aquatic ecology Marine microbiology Microbial ecology Ecologia aquàtica Ecologia microbiana Aigua - Microbiologia Periodicals. Revistes electròniques
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	"International journal." Refereed/Peer-reviewed
Sommario/riassunto	AME serves as a worldwide forum for scientific communications on all aspects of aquatic microbial dynamics. In particular, the journal covers research on viruses, prokaryotes and eukaryotes - both planktonic and benthic, autotrophic and heterotrophic - in marine, limnetic and brackish habitats.

2. Record Nr.	UNINA9910917290103321
Autore	Oplotnik Žan Jan

Pubbl/distr/stampa	Institute for Local Self-Government and Public Procurement Maribor, 2013 [s.l.] : , : Lex Localis Press (Institute for Local Self-Government and Public Procurement Maribor), , 2013
Descrizione fisica	1 online resource (1 p.)
Soggetti	Political Science / Political Process Political science
Lingua di pubblicazione	Sloveno
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Risk in banking business can not be avoided because the latter is strongly embedded in the very nature of it and banks should therefore be aware of the importance of effective risk management, encompassing the identification, measurement and assessment of each type of risk. Risk management can be important source of gaining competitive advantage and a way to survive in the world of banking. One of the most important risk in bank is the credit risk. Credit risk can be defined as the potential that a bank borrower or counterparty will fail to meet its obligations. The goal of credit risk management is to maximise bank's risk-adjusted rate of return by maintaining credit risk exposure within acceptable parameters. Banks need to manage the credit risk inherent in the entire portfolio as well as the risk in individual credits of transaction. Banks should also consider the relationships between credit risk and other risks. The effective management of credit risk is a comprehensive component of a comprehensive approach to risk management and essential to the long-term success of bank. Risk management is usually regulated by bank directives, prescriptions, where the most important in Slovenia is the Law about banking with under law acts.</p>
