Sommario/riassunto	This title posits a new explanation of the longstanding textual problem affecting the Words of Institution in St. Luke's Gospel, by arguing that the social situation of the early Christian community explains why such

emendations were made. . . By examining the manner in which manuscripts function as windows into the social world of early Christianity, Billings provides a fruitful study of the longstanding gap in our knowledge of a significant textual problem represented by the Western Text of Luke.

## Sommario/riassunto

"Soldier's Paradise is an exploration of the ideologies that fueled military dictatorships in late-twentieth-century Africa. Through speeches and writing, the development of martial law, and public prosecutions, including the 1977 raid on Fela Kuti's compound, Samuel Fury Childs Daly provides a history of Nigeria's military dictatorship. In so doing, he also shows how the new nation's legal structures, largely inherited from British colonizers, were complicit with and facilitated military rule. Using an original collection of legal records, archival documents, and memoirs, Soldier's Paradise shows how law enabled militarism-and worked against it. Daly establishes Nigeria's military rulers as having recognizable theories and participating in legitimate structures of governance. In so doing, this book pushes back against some strains of African social history which try to position the militarism that affected the bulk of postcolonial African societies as aberrant. Instead, it explores how these governments worked (and didn't work) and why they appealed to civilians (and didn't). Long submerged by more hopeful ideological currents, militarism is now rising back to the surface of African politics. Soldier's Paradise describes where it came from, and why it lasted so long"--

Sommario/riassunto	<p>The success of any activity and process depends fundamentally on the possibility of balancing (symmetry) needs and their satisfaction. That is, the ability to properly define a set of success indicators. The application of the developed new multi-criteria decision-making (MCDM) methods can be eliminated or decreased by decision-makers' subjectivity, which leads to consistency or symmetry in the weight values of the criteria. In this Special Issue, 40 research papers and one review study co-authored by 137 researchers from 23 different countries explore aspects of multi-criteria modeling and optimization in crisp or uncertain environments. The papers propose new approaches and elaborate case studies in the following areas of application: MCDM optimization in sustainable engineering, environmental sustainability in engineering processes, sustainable multi-criteria production and logistics processes planning, integrated approaches for modeling processes in engineering, new trends in the multi-criteria evaluation of sustainable processes, and multi-criteria decision-making in strategic management based on sustainable criteria.</p>
