

1. Record Nr.	UNISALENTO991000157699707536
Titolo	Des fleurs pour vous : Balzac, Barres, Baudelaire, Eichendorff, Giono, Jaccottet, Taine, Zola ... : rencontres du Littoral IV / textes réunis par Philippe Bonnefis, Dolors Djidzek-Lyotard et Patrick Wald Lasowski
Pubbl/distr/stampa	Villeneuve d'Ascq : Universite Charles-de-Gaulle Lille III, 2002
Descrizione fisica	250 p. ; 24 cm
Collana	Revue des sciences humaines ; 264
Altri autori (Persone)	Bonnefis, Philippeauthor Djidezk Lyotard, Dolorès Wald Lasowski, Patrick
Disciplina	840.9
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910918590603321
Autore	Garraffa Maria
Titolo	Linguistic Theory for Aphasia // by Maria Garraffa, Giuditta Smith
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Palgrave Macmillan, , 2024
ISBN	9783031771347 9783031771330
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (108 pages)
Altri autori (Persone)	SmithGiuditta
Disciplina	616.8552
Soggetti	Psycholinguistics Linguistics Speech therapy Neuropsychology Psycholinguistics and Cognitive Linguistics Theoretical Linguistics / Grammar Speech and Language Therapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introduction -- 2. Disorders of phonology in aphasia -- 3. Disorders of morphology in aphasia -- 4. Disorders of semantics in aphasia -- 5. Disorders of syntax in aphasia -- 6. Disorders of pragmatics and discourse in aphasia -- 7. Current topics in linguistics and aphasia.
Sommario/riassunto	This book presents a cutting-edge overview of the language models of in phonology, morphology, syntax, and pragmatics, proposed to underlie language phenotypes across aphasic syndromes, as well as the potential applications of linguistic theory to advance therapeutic treatment -and research- in aphasiology. It draws together examples from a range of aphasic syndromes, providing valuable insights into the way language-specific properties may affect the manifestation of language deficits across aphasia. The authors discuss experimental evidence of deficits across language domains, which is crucial to those who study language abilities in aphasia. It concludes by examining how linguistic theory might contribute to patient classification in aphasia and to future directions for research in experimental linguistics and

aphasiology. This book will appeal to students and scholars of neuropsychology, psycholinguistics, linguistics, and speech and language therapy. Maria Garraffa is Associate Professor in Linguistics at the Faculty of Medicine and Health Sciences, University of East Anglia, UK. Giuditta Smith is Senior Researcher at the University of East Anglia.
