

1. Record Nr.	UNINA9910919819103321
Autore	Bardales Ricardo H
Titolo	The Interventional Cytopathologist : Ultrasound Guided Fine-Needle Aspiration of Superficial Masses with Ultrasound Correlation / / edited by Ricardo H. Bardales
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	9783031737022 3031737024
Edizione	[2nd ed. 2024.]
Descrizione fisica	1 online resource (407 pages)
Collana	Essentials in Cytopathology, , 1574-9061 ; ; 30
Disciplina	616.07
Soggetti	Pathology Medicine - Research Biology - Research Radiology Gastroenterology Biomedical Research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Ultrasound: General Considerations -- The Interventional Cytopathologist -- The Thyroid Gland -- The Parathyroid Gland -- The Salivary Glands -- Miscellaneous Masses of Head and Neck and Other Body Sites -- The Lymph Nodes -- The Breast -- Personal Experience Performing Ultrasound-Guided Fine-Needle Aspiration of Superficial Masses.
Sommario/riassunto	This book provides an updated comprehensive review of the FNA cytology of superficial neoplastic and non-neoplastic disease processes obtained by percutaneous ultrasound guidance. Selected video clips are intended to illustrate the most salient US findings of common entities and the methodology to appropriately harvest adequate material for diagnosis and performance of ancillary tests. The most current World Health Organization classifications of tumors of thyroid, parathyroid, and salivary glands, breast, and lymph nodes are included in the corresponding chapters, and they are followed to complement the cytomorphology and ancillary tests of the described entities. This text

emphasizes the basic ultrasound characteristics of thyroid nodules, the cytology of common and uncommon neoplastic and non-neoplastic processes according to The Bethesda System for Reporting Thyroid Cytopathology and provides a technical guide for how to perform ultrasound-guided FNA of thyroid nodules to obtain adequate material for diagnosis. The volume also reviews the molecular aspects of thyroid neoplasia useful for diagnosis and targeted therapy. The Interventional Cytopathologist: Ultrasound Guided Fine-Needle Aspiration of Superficial Masses with Ultrasound Correlation 2nd Edition is a useful guide for ultrasound evaluation, cytological interpretation and differential diagnostic considerations of superficial masses. It aims to be a valuable source of information for cytopathologists, cytopathology fellows, cytotechnology students and upper level pathology residents. Endocrinologists, thyroidologists, head and neck specialists, radiologists and any professional with interest in ultrasound and fine needle aspiration cytology of superficial masses will benefit from this book. .
