

1. Record Nr.	UNINA9910921016803321
Autore	Venkat Ramanan Padmasani
Titolo	Fever in Children : Case Based Learning / / by Padmasani Venkat Ramanan, Ramachandran Padmanabhan
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2024
ISBN	9789819799671 9819799678
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (204 pages)
Altri autori (Persone)	PadmanabhanRamachandran
Disciplina	618.92
Soggetti	Pediatrics Internal medicine Diagnosis Internal Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Fever with respiratory symptoms: Cases 1 to 5 -- Fever with gastrointestinal symptoms: Cases 6 to 9 -- Fever with genitourinary symptoms: Cases 10 to 13 -- Fever with body ache, muscle or joint pains: Cases 14 to 16 -- Fever with neurological symptoms: Cases 17 to 19 -- Fever without focus Cases 20-22 -- Multisystem involvement /Miscellaneous Cases 23 to 25 -- Management principles 26-27.
Sommario/riassunto	Fever is one of the most common presenting complaints in Pediatric practice. It can be a cause of concern to parents and the treating Pediatrician. This book describes a practical, case-based approach to diagnosing the cause of fever. The presentation simulates everyday challenges in the outpatient clinic and in-patient ward rounds, taking the learner systematically through the process of targeted history and focused clinical examination, which should result in making a provisional clinical diagnosis. A discussion on possible differentials, rational use of investigations, interpretation of lab reports, and treatment follows this. One of the unique features of this book is the initial note on parental counseling in challenging situations. The chapters provide a system-wise syndromic approach to diagnosing

infections through case vignettes. It also includes cases with multisystem involvement and explanations of when to suspect non-infectious causes. This book will be of immense use to Pediatric postgraduate trainees and practicing Pediatricians. It covers pitfalls in diagnosis, atypical presentations, complications of common illnesses, causes of failure to respond to treatment, and common fallacies in interpreting lab results. The recent advances and the use of diagnostic facilities are explained.
