Nota di contenuto	Preface -- Projecting lattice polytopes according to the Minimal Model Program -- Zeta-polynomials, superpolynomials, DAHA and plane curve singularities -- Rational points over C_1 fields -- On isomorphisms of ind-varieties of generalized flags -- Spectral description of non-commutative local systems on surfaces and non-commutative cluster varieties -- Semi-stable reduction of foliations -- The Hasse principle for 9-nodal cubic 3-folds -- Manin's work in birational geometry -- Endomorphism Algebras and Automorphism Groups of certain Complex Tori.
Sommario/riassunto	This book is a tribute to the memory of Yuri Ivanovich Manin, who passed away on January 7, 2023. Manin was one of the giants of modern mathematics. His work covered a wide range of fields, including logic, number theory, geometry, mathematical physics,

theoretical computer science, and linguistics. The contributions collected here are on topics close to his life-long passion: arithmetic and algebraic geometry.
