Sommario/riassunto	"Standards in Implant Dentistry provides good practice guidelines on the knowledge, clinical competence and skills required of dentists who provide dental implant treatment, in order to enhance the national standards of quality and safety of care. The book incorporates principles from the GDC guidance to dentists, FGDP good practice guidelines as well as COPDEND curriculum for Dental Foundation Training. Standards in Implant Dentistry is essential reading for dental professionals from any background, as well as responding to the need

for better patient education on the nature and mechanics of the treatments. Providing guidelines that can be applied to any clinical practice, Standards in Implant Dentistry is intended for the whole dental team, including general practitioners, oral and maxillofacial surgeons, and dental nurses"--
