Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages 36-42).
Nota di contenuto	Cover; Contents; List of Figures; Foreword; Acknowledgments; Biographical Sketch of the Nurse Theorist; Chapter 1 - Origin of the Theory; Chapter 2 - The Neuman Systems Model: Assumptions and Concepts; Chapter 3 - Application to Practice and Research; Glossary; References; Bibliography; About the Author
Sommario/riassunto	Neuman's Systems Model is a comprehensive conceptual framework, used extensively in nursing education; it reflects nursing's interest in holism and the influence of the environment on health. This volume provides a clear and concise overview of the model and includes a brief biography of the theorist and a succinct discussion of the theory itself.

Sommario/riassunto	Written by internationally renowned experts, the 4th edition of this book provides detailed practical guidance and advice on the diagnosis and management of the complete range of ocular cancers. Supplying the reader with state-of-the-art knowledge required in order to identify these cancers early and to treat them as effectively as possible, this book is divided into seven volumes: Basic Principles, Conjunctival Tumors, Orbital Tumors, Uveal Tumors, Retinal Tumors, Retinoblastoma, and Eyelid Tumors. The information presented enables

readers to provide effective patient care using the latest knowledge on ophthalmic oncology and to verify diagnostic conclusions based on comparison with numerous full-color clinical photographs from the authors' private collections, histopathologic microphotographs, imaging studies, and crisp illustrations. Clinical Ophthalmic Oncology's clinically focused and user-friendly format allows for rapid retrieval of information in daily practice and is written for residents, fellows, and any physician involved in the care of patients with ocular or orbital malignancies. Additionally, this edition includes several hundred new images and videos to improve comprehension of procedures and techniques. This volume provides the examination techniques, classification, and differential diagnosis of conjunctival and corneal tumors, carefully explained with treatment options in detail. .
