Sommario/riassunto

Sentence Patterns in English and Hebrew offers an innovative perspective on sentential syntax, in which sentence patterns are introduced as constructions within the general framework of Construction Grammar. Drawing on naturally occurring data collected from the Internet, the study challenges the prevailing view of predication as the sole mechanism of sentence formation, and introduces the idea of patterning as a complementary, sometimes even alternative mechanism. Major sentence patterns of English and Hebrew are systematically presented, targeting both their form and the
