|-------------------------|---|
| 1. Record Nr. | UNINA9910952293903321 |
| Autore | Farjon Aljos |
| Titolo | An atlas of the world's conifers : an analysis of their distribution, biogeography, diversity, and conservation status / / by Aljos Farjon and Denis Filer |
| Pubbl/distr/stampa | Leiden ; ; Boston : , : Brill, , 2013 |
| ISBN | 9789004211810 9004211810 |
| Edizione | [1st ed.] |
| Descrizione fisica | 1 online resource (524 p.) |
| Altri autori (Persone) | FilerDenis |
| Disciplina | 585 |
| Soggetti | Conifers - Geographical distribution Coníferes Biogeografia Llibres electrònics |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references. |
| Nota di contenuto | Preliminary Material -- Introduction -- Creating the Atlas of the World's Conifers -- Global and Trans-Continental Distributions -- North America -- Mexico, Central America and the West Indies -- Europe and the Mediterranean -- Mainland Asia and Japan -- Malesia -- Australasia -- South America -- Africa -- Examples of Further Research -- References -- Tables and Indices. |
| Sommario/riassunto | A 2014 Choice Magazine 'Outstanding Academic Title' An Atlas of the World's Conifers is the first ever atlas of all known conifer species. It is based on locality information of circa 37,000 collected herbarium specimens held in scientific institutions. As well as providing natural distribution maps for each species, Farjon and Filer give the reader comprehensive insight into the biogeography, diversity and conservation status of conifers on all continents, dispelling the widely held view that they are primarily a northern boreal plant group. Conifer diversity is analysed and presented with a taxonomic and geographic perspective. Distribution patterns are interpreted using the latest information on continental drift, dispersal and phylogeny. The entire dataset supporting the Atlas can be consulted and verified online. |

These data can also be used for further research and are an invaluable resource for anyone working on conifer systematics, biogeography or conservation. An Atlas of the World's Conifers indicates the known distribution of all conifers including an analysis of their biogeography, diversity and conservation status. Also available from Brill is Aljos Farjon's A Handbook of the World's Conifers , published in 2010 (ISBN 978 90 04 17718 5) which is a 2017 Choice Magazine 'Outstanding Academic Title'.
