associations; Global finance as a complex set of overlapping
assemblages; The functionality and roles of TFAs; The power of
enrollment; Implications for transnational governance more generally;
Notes; Bibliography; Index

Sommario/riassunto

The role of business in global governance is now widely recognized, but exploration of its role in global financial governance has been more haphazard than systematic. This book provides the first comprehensive analysis of the role of transnational financial associations (TFAs) in the organization of global finance. This book develops three theoretical themes of assemblage, functionality, and power as enrolment. These themes challenge approaches that treat financial power as emanating from a single location or force. Whilst existing approaches tend to treat TFAs as irrelevant or as me
