Kemp -- Generational and age discourse in IT firms / Julie McMullin, Emily Jovic and Tammy Duerden Comeau -- Aging and age discrimination in IT firms / Julie McMullin and Tammy Duerden Comeau -- Conclusion : inequality regimes and new economy work / Emily Jovic and Julie McMullin.
Sommario/riassunto	In the new knowledge-based economy, information technology (IT) is a major field of employment. However, the fast pace of technological innovation, globalization, and the volatile stock market have made IT an increasingly risky business - for some employees more than for others. This volume examines how women and older workers in small

IT companies are disproportionately vulnerable to economic uncertainty within their industry. Drawing on original survey and interview data, the authors explore how gender and age affect work and workplace culture to produce a fresh contribution to the literature on inequality.
