1. Record Nr. UNINA9910953272003321

Titolo	Envibuild 2012 : selected, peer reviewed papers from the enviBUILD 2012, October 25-26, 2012 and the Building Performance Simulation Conference 2012, November 8-9, 2012, Brno, Czech Republic / / edited by Milos Kalousek, Martin Nemecek, Lukas Chuchma
Pubbl/distr/stampa	Durnten-Zurich : , : Trans Tech Publications Ltd., , [2013] ©2013
ISBN	3-03813-977-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (318 p.)
Collana	Advanced materials research, , 1022-6680 ; ; volume 649
Altri autori (Persone)	ChuchmaLukas KalousekMilos NemecekMartin
Disciplina	690.08
Soggetti	Buildings - Performance
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	enviBUILD 2012; Preface and Committees; Table of Contents; Chapter 1: Near Zero Energy Buildings; Airtightness of Buildings in Slovakia; Energy Concept Design of Zero Energy Buildings; Impact of Internal Thermal Insulation Systems on Static Behaviour of Exterior Walls; The Evaluation of Nearly Zero Energy Buildings in the Czech Republic; The Specifics of the Real Estate Market of the Low- and Passive Energy Buildings; Chapter 2: Quality of Indoor Environment; A New Building System Made of Glass Fiber Reinforced Mineral Matrix Composites Aerodynamic Mode of Double-Skin Transparent Facade with Narrow Physical Cavity and its Influence on Indoor Environment in the Summer SeasonEffect of Air Heating System Distribution on Temperature Stratification in a Room; Analysis of an Indoor Environment in Year-Round Operation; Analysis of the Behavior of Glass Claddings; Analysis of the Influence of Geometrical Thermal Bridges and their Elimination by Using a Composite Material Based on Secondary Raw Materials; Comparing Methods for Calculating Thermal Stability of Rooms Comparison of Temperatures in the Corner of Wall Footing through 2D and 3D ViewsComputer Simulations of Room Acoustics in Sporting Facilities; Differences Ug - Values of Glazing Measured In Situ with the

Influence Factors of the Internal Environment; Effect of the Geometric Solution of Cladding on the Quality of the Indoor Microclimate; Envelope Structures of Low Energy Wooden Houses Considering Indoor Climate; Experimental Timber Frames House EXDR1
Indoor Environment State of Classrooms Situated in the Loft Spaces of Civil Engineering Faculty TU in Kosice - Dynamic Analysis Using Design BuilderAssessing the Risk Relative to Indoor Environment Quality in Education Buildings; Measuring Methodology and Results of Heat-Air-Moisture Performances at Building Envelope Levels; Microscopic Filamentous Fungi in Buildings, Preventing their Occurrence and their Remediation Using Nanofibers; New Materials and Assessment of Ventilation Efficiency Floors; Optimisation of the Design of Daylight Guidance Systems Including Measurement Methodology
Perceived Loudness of Sound Transmitted through Light Weight and Heavy Weight WallsProblematic of Humidity Degradation of Plaster with Indoor Fresco Decoration in Romanesque Rotunda in Znojmo; Quasistationary and Dynamic Simulation of Summer Overheating of Passive Timber House; Regeneration of Precast Panel Buildings in Terms of its Effect on Daylight; Selected Problems of Renovated Apartment Buildings Entrances in Slovakia; Simulation of Indoor Climate and Energy Consumption of Primary School
The Importance of a Fan Location in the Front Door in Measuring of the Air Permeability by the Blower Door Test

Sommario/riassunto

Indoor quality of buildings has a direct impact on its inhabitants. The design of a building needs should include a healthy environment and if possible include application of building materials which are free of harmful substances and allow a low energy design. The building industry nowadays should concentrate on low energy buildings and put emphasis on natural materials and renewable resources, so todays aim is to decrease the energy requirements and contribute to a healthier indoor environment in buildings and to sustainable development. The peer reviewed papers are grouped as follows: Chapt
