Sommario/riassunto	What America does - or fails to do - in the next few years to solve the problem of climate change will largely determine the fate of the earth and humanity for centuries to come. Despite the efforts by some states, local governments and individual citizens to respond, controversy still embroils national efforts to come up with a solution. This book by Robert Repetto, a leading environmental economist, lets the reader cut through the confusion and political rhetoric and understand the way to resolve the climate problem. It explains in clear, accessible language how a sensible national policy to
