

1. Record Nr.	UNINA9910953429903321
Titolo	Building materials : properties, performance and applications / / Donald N. Cornejo and Jason L. Haro, editors
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2009
ISBN	1-61728-154-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (422 p.)
Collana	Materials science and technologies series
Altri autori (Persone)	CornejoDonald N HaroJason L
Disciplina	624.1/8
Soggetti	Building materials
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>Intro -- BUILDING MATERIALS: PROPERTIES, PERFORMANCE AND APPLICATIONS -- BUILDING MATERIALS: PROPERTIES, PERFORMANCE AND APPLICATIONS -- CONTENTS -- PREFACE -- Chapter 1 SYNTACTIC FOAMS AS BUILDING MATERIALS CONSISTING OF INORGANIC HOLLOW MICROSPHERES AND STARCH BINDER -- ABSTRACT -- 1. INTRODUCTION -- 2. CONSTITUENT MATERIALS FOR SYNTACTIC FOAMS -- 2.1. Hollow Microspheres -- 2.2. Starch as Binder -- 3. THE PRINCIPLES OF THE BUOYANCY METHOD FOR MANUFACTURING SYNTACTIC FOAMS -- 4. BEHAVIOUR OF HOLLOW MICROSPHERES IN AQUEOUS GELATINIZED STARCH -- 4.1. Lattice Models for Microsphere Dispersion in Aqueous Gelatinized Starch -- 4.2. Numerical Calculation of Minimum Inter-Microsphere Distance -- 4.3. Comparison between Theoretical and Experimental Results for VER for IBVMS -- 4.4. Starch Concentration between Microspheres and Syntactic Foam Density Estimation -- 4.5. Shrinkage after Moulding and Composition -- 5. INTERACTION BETWEEN STARCH PARTICLES AND HOLLOW MICROSPHERES IN AQUEOUS ENVIRONMENT -- 6. MECHANICAL BEHAVIOUR OF SYNTACTIC FOAMS -- 6.1. Transitions in Mechanical Behaviour -- 6.2. Relative Conditions and Rules of Mixtures -- 6.3. Mechanical Properties and Failure Behaviour -- 7. SANDWICH COMPOSITES -- 7.1. Fabrication of Syntactic Foam Panel -- 7.2. Skin Paper Preparation for Tensile Property Characterization -- 7.3. Sandwich Composite Manufacture -- 7.4. Mechanical testing and</p>

Calculations -- 7.5. Constituent Materials Behaviour -- 7.6. Sandwich Composites Behaviour -- CONCLUSION -- REFERENCES -- Chapter 2

SALT WEATHERING OF NATURAL BUILDING STONES: A REVIEW OF THE INFLUENCE OF ROCK CHARACTERISTICS -- ABSTRACT -- 1.

INTRODUCTION -- 2. MINERALS AND OTHER CONSTITUENTS -- 2.1.

Chemical Susceptibility -- 2.2. Physical Susceptibility -- 2.3.

Deleterious Effects of Rock Constituents -- 3. TEXTURE AND STRUCTURE -- 4. PORE SPACE.

4.1. Bulk Properties -- 4.2. Pore Characteristics -- 5. STRENGTH -- 6.

ALTERATION HISTORY -- 7. HETEROGENEITY -- CONCLUSION --

ACKNOWLEDGMENTS -- REFERENCES -- Chapter 3 STUDY ON ADSORPTION AND THERMOELECTRIC COOLING SYSTEMS USING BOLTZMANN TRANSPORT EQUATION APPROACH -- ABSTRACT --

ABBRIVIATIONS -- Subscripts -- Superscripts -- 1. INTRODUCTION --

2. GENERAL FORM OF BALANCE EQUATIONS -- 2.1. Derivation of the Thermodynamic Framework -- 2.2. Mass Balance Equation -- 2.3.

Momentum Balance Equation -- 2.4. Energy Balance Equation -- 2.5.

Summary of Section 2 -- 3. CONSERVATION OF ENTROPY -- 4.

ADSORPTION COOLING -- 4.1. Description of Adsorption Cooling Model -- Evaporator -- Adsorption Isotherms and Kinetics -- Bed -- Condenser -- Mass Balance -- 4.2. Discussion -- 4.3. Summary of Section 4 -- 5. MACRO AND MICRO THERMOELECTRIC COOLERS -- 5.1.

Thermoelectric Cooling -- 5.1.1. Energy Balance Analysis -- 5.1.2.

Entropy Balance Analysis -- 5.1.3. Temperature-Entropy Plots of Bulk Thermoelectric Cooling Device -- 5.2. Transient Behavior of Thermoelectric Cooler -- 5.2.1. Derivation of the T-S Relation -- 5.2.2.

Discussion -- 5.2.3. Summary of Section 5.2 -- 5.3. Microscopic Analysis: Super-Lattice Type Devices -- 5.3.1. Thermodynamic Modeling for Thin-Film Thermoelectrics -- 5.3.2. Discussion -- 5.3.3.

Summary of Section 5.3 -- CONCLUSIONS -- APPENDIX. GAUSS THEOREM APPROACH -- ACKNOWLEDGEMENTS -- REFERENCES --

Chapter 4 MICROBES AND BUILDING MATERIALS -- ABSTRACT -- 1.

INTRODUCTION -- 2. MICROORGANISMS COLONIZING ROCK, PLASTER, MORTAR, PAINT COATINGS, PLASTER BOARD AND OTHER BUILDING MATERIALS -- 2.1. Scenario of Microbial Settlement in Building Materials and Monuments -- 2.2. Bacteria -- 2.3. Fungi -- 2.4.

Cyanobacteria and Algae -- 2.5. Lichens.

3. MECHANISMS AND DESTRUCTION PHENOMENA CAUSED BY MICROBES RANGING FROM MERE ESTHETICAL SPOILAGE TO SIGNIFICANT MATERIAL LOSSES -- 4. ENVIRONMENTAL FACTORS - HUMIDITY, VENTILATION, NUTRIENT AVAILABILITY - ENHANCING OR INHIBITING MICROBIAL GROWTH -- 5. STATE OF THE ART: METHODS FOR DETECTION AND ANALYSIS OF BIODETERIORATIVE ORGANISMS, ESPECIALLY HIGHLIGHTING THE MOLECULAR TECHNIQUES -- 5.1.

Culture-Dependent Strategy -- 5.1.1. Microscopy Techniques -- 5.2.

Molecular Strategy -- 5.2.1. Extraction of Nucleic Acids from Collected Samples -- 5.2.2. PCR Amplification of Target Genes -- 5.2.3.

Genotyping Techniques-Fingerprinting -- 5.2.4. Creation of Clone Libraries and Sequence Analysis -- 5.2.5. In Situ-Hybridization Analysis -- 5.2.6. RNA-Based Molecular Analyses -- 5.3. Culture-Dependent Versus Culture-Independent Techniques -- 6. POSSIBLE STRATEGIES FOR ANTIMICROBIAL TREATMENTS AND PREVENTIVE MEASURES WITH FOCUS ON PROS AND CONS OF HYDROPHOBIC TREATMENTS, NANO-TECHNOLOGY BASED PAINT COATINGS AND NOVEL DISINFECTANTS --

6.1. Cleaning and Biocide Treatments -- 6.2. Consolidants, Coatings and Hydrophobic Treatment -- 6.3. Cementations, Fillings, Substitutes, Artificial Material -- REFERENCES -- Chapter 5 DETERMINATION OF MOISTURE TRANSPORT AND STORAGE PROPERTIES OF BUILDING

MATERIALS -- 1. INTRODUCTION -- 2. DETERMINATION OF MOISTURE DIFFUSIVITY -- 2.1. Slice-Dry-Weigh Method -- 2.2. Gamma-Ray Attenuation -- 2.3. Neutron Radiography -- 2.4. Nuclear Magnetic Resonance -- 2.5. Computer Tomography -- 3. EVALUATION OF ISOTHERMAL MOISTURE TRANSPORT COEFFICIENTS -- 3.1. Gravimetric Sorption-Desorption Method (LEPTAB) -- Describe of the Method -- Experimental Study -- Materials and Conservation -- Isothermal Absorption-Desorption Tests (Belarbi Et Al. 2006) -- 2.1.5. Measurement Results -- Discussions -- 3.2. Cup Method (DBM) -- Experimental Set-Up. Measured Results -- 4. EVALUATION OF THE TEMPERATURE GRADIENT COEFFICIENT -- 4.1. Description -- 4.2. Experimental Set-Up -- Materials and Preparations -- Tests and Measurements -- 4.3. Measurement Results -- 5. DETERMINATION OF THE SORPTION ISOTHERMS OF LIME-CEMENT MORTAR -- 5.1. Experimental Set-Up -- 5.2. Measurement Results -- CONCLUSIONS -- REFERENCES -- Chapter 6 BUILDING MATERIALS AND ACOUSTIC COMFORT: SIMULATIONS, MEASUREMENTS AND APPLICATIONS -- ABSTRACT -- 1. INTRODUCTION -- 2. SOUND INSULATION - SOUND INSULATION INDEX - ACOUSTICS DEFINITIONS -- 3. FIELD MEASUREMENTS AND SIMULATION OF THE SOUND INSULATION INDEX -- 4. MEASUREMENTS AND APPLICATIONS -- Home 1 -- Home 2 -- Home 3 -- Home 4 -- Home 5 -- Home 6 -- Home 7 -- Home 8 -- CONCLUSIONS -- REFERENCES -- Chapter 7 RADON EXHALATION RATES OF BUILDING MATERIALS: EXPERIMENTAL, ANALYTICAL PROTOCOL AND CLASSIFICATION CRITERIA -- ABSTRACT -- INTRODUCTION -- EXPERIMENTAL SET-UP -- VALIDATION TEST -- EXHALATION RATES CALCULATION -- Radon Exhalation Calculation -- Thoron Exhalation Calculations -- THE INFLUENCE OF TEMPERATURE ON RADON EXHALATION RATES -- GUIDELINES TO SET A STANDARD PROTOCOL TO MEASURE RADON EXHALATION RATES -- Exhalation Rates of Building Materials and Proposal of a Classification Scheme -- CONCLUSION -- REFERENCES -- Chapter 8 HIGH TEMPERATURES BEHAVIOR OF MASONRY STRUCTURES: MODELIZATION AND PARAMETRIC STUDY -- ABSTRACT -- NOMENCLATURE -- 1. INTRODUCTION -- 2. THEORETICAL ASPECTS OF THE HYDRO-THERMAL MODEL -- 2.1. The model's Hypothesis -- 2.2. Constitutive Equations -- 2.2.1. Conservation Laws -- 2.2.1.a. Liquid Water Mass Conservation -- 2.2.1.b. Vapor Mass Conservation -- 2.2.1.c. Dry Air Mass Conservation -- 2.2.1.d. Entropy Equation -- 2.2.2. Constitutive Equations -- 2.2.2.a. Darcy's Law for Liquid Water Flow -- 2.2.2.b. Darcy's Law for Gas Mixture Flow. 2.2.2.c. Fick's Laws -- 2.2.2.d. Fourier's Law -- 2.2.2.e. Liquid Vapor Phase-Change Law -- 2.2.3. State Equations -- 3. GOVERNING EQUATIONS OF THE HYDRO-THERMAL MODEL -- 3.1. Water and Vapor Mass Diffusion -- 3.2. Dry Air Mass Diffusion -- 3.3. Energy Diffusion -- 4. NUMERICAL FORMULATION OF THE MODEL -- 4.1. Presentation of Equations Under Matrix Form -- 4.2. Finite Volume Discretization -- 4.2.1. Principle of the Finite Volume Method -- 4.2.2. Discretization of Model's Equations -- 5. NUMERICAL SIMULATIONS AND EXPERIMENTAL TESTS -- 5.1. Experimental Test Description -- 5.2. Thermal Boundary Conditions -- 5.2.1. Face Exposed to Fire -- 5.2.2. Face Non Exposed to Fire -- 5.3. Hydrous Boundary Conditions -- 5.4. Numerical Simulation -- 5.4.1. Drying a Thin Wall by Elevated Temperatures -- 5.4.2. Material Properties -- 5.5. Results and Discussions -- 5.5.1. Comparison between Theoretical and Experimental Results -- 5.5.2. Numerical Results -- 5.5.1.a. Temperature Evolution -- 5.5.1.b. Vapor Pressure Evolution -- 5.6. Effects of Some Parameters on the Hydro-

Thermal Response of Thin Wall -- 5.6.1. Initial Water Content Effect -- 5.6.2. Intrinsic Permeability Effect -- 5.6.3. Effect of the Form of Isotherm Sorption Curve -- CONCLUSIONS -- ACKNOWLEDGEMENTS -- APPENDIX 1. -- APPENDIX 2. COMPONENTS RESULTING FROM THE EQUATIONS REPRESENTED UNDER THE MATRIX FORM -- APPENDIX 3. VARIATION OF DIFFERENT PHYSICAL UNITS -- REFERENCES -- Chapter 9 AGRICULTURAL WASTES AS BUILDING MATERIALS: PROPERTIES, PERFORMANCE AND APPLICATIONS -- ABSTRACT -- INTRODUCTION -- VEGETABLE FIBERS AS NON-CONVENTIONAL BUILDING MATERIAL -- PHOSPHOGYPSUM AS NON-CONVENTIONAL BUILDING MATERIAL -- VEGETABLE FIBER-CEMENT: COMPONENT, COMPOSITE, AND PERFORMANCE -- ROOFING TILES -- Improving Tiles Performance By Accelerated Carbonation -- Thermal Properties of Undulated Tiles. STRATEGIES FOR IMPROVING THE PERFORMANCE OF THE COMPOSITES.

Sommario/riassunto

Building material is any material which is used for a construction purpose. Apart from naturally occurring materials, many man-made products are in use. The manufacture of building materials is an established industry in many countries and the use of these materials is typically segmented into specific specialty trades, such as carpentry, plumbing, roofing and insulation work. This new book presents a wide variety of research on issues facing the building industry today. A study on the use of syntactic foams as a building material is presented. The acoustic performance of building materials with respect to their insulative properties is also analyzed. Other topics include the performance of building stones in relation to salt weathering, the behavior of building materials submitted to fire, the problem of microbe invasion into building materials and a study to develop a series of experimental methods to determine the moisture transport and storage properties of building materials.
