Priorities--William Ascher -- Appendix E Program Evaluation of
Environmental Policies: Toward Evidence-Based Decision Making--Cary
Coglianese and Lori D. Snyder Benneer -- Appendix F Panel Members,
Staff, and Contributors.

Sommario/riassunto

With the growing number, complexity, and importance of environmental problems come demands to include a full range of intellectual disciplines and scholarly traditions to help define and eventually manage such problems more effectively. Decision Making for the Environment: Social and Behavioral Science Research Priorities is the result of a 2-year effort by 12 social and behavioral scientists, scholars, and practitioners. The report sets research priorities for the social and behavioral sciences as they relate to several different kinds of environmental problems.
