Sommario/riassunto	This is a unique case study reference for students in the medical surgical nursing core course and a review/workbook for students about to embark on the NCLEX-RN exam. Unlike other reviews, the book embeds required information into compelling, unfolding case studies--studies that evolve over time-in order to promote active learning and facilitate knowledge retention. These unfolding case studies are of particular value because they closely mimic real-life situations in nursing and provide situational mental models that assist students with problem-solving and critical thinking techniques.
