Sommario/riassunto	This book brings together two vitally important strands of 20th-century thinking to establish a set of simple and elegant principles for planning, project design and evaluation. It explains the backgrounds of cultural ecofeminism and critical systems thinking, and what we find when they are systematically compared. Both theories share a range of concepts, have a strong social justice ethic, and challenge the legacy of

modernity. The book takes theory into practice.

Sommario/riassunto	This book examines the intricate and unusual relationship between the sacred and secular spheres of English medieval culture, positing that the assimilation of sacred and secular motifs could be in either

direction, or even in both directions. That is, medieval English writers could appropriate biblical paradigms to express secular themes, and vice versa. Codicological, psychoanalytic, feminist, and new historicist insights inform readings of Beowulf, Middle English lyric poetry, the Gawain-poet, Chaucer, and Malory, among others. Besserman elucidates the structural and thematic complexity
