Sommario/riassunto

As we approach the 25th anniversary of the first recognition of
HIV/AIDS in 1981, this book reflects on the international impact of the
disease. It has persistently remained a global issue, with more than 50
million people worldwide estimated to have been infected since that
date. This ambitious book, written by 165 authors from 30 countries,
offers a multi-country comparative study that examines how the
response to the common, global threat of HIV is shaped by the history,
culture, institutions and health systems of the individual countries
affected. Increasingly the shift of health systems has
