| Note generali | "This document highlights the presentations and discussions that occurred during the workshop, which was held on September 22, 2010, in Tampa, Florida." -P. 1. |
| Nota di contenuto | Frontmatter -- REVIEWERS -- CONTENTS -- INTRODUCTION -- GULF STUDY DESIGN -- APPENDIX. |
| Sommario/riassunto | The Gulf of Mexico oil spill is unprecedented not only in its size but also in the use of chemical dispersants and controlled burns to remove the oil. The National Institute of Environmental Health Sciences (NIEHS) is designing a study to investigate the health effects on clean-up workers. The IOM held a workshop to review and comment on NIEHS's study protocol. |
