

1. Record Nr.	UNINA9910953885003321
Autore	Eberhard John P.
Titolo	Brain landscape : the coexistence of neuroscience and architecture // John Paul Eberhard
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2009
ISBN	0-19-045026-6 0-19-971584-X 1-281-93090-3 9786611930905
Descrizione fisica	1 online resource (xviii, 259 pages) : illustrations
Disciplina	616.8
Soggetti	Neurosciences Architecture Space perception - Physiological aspects Brain - physiology Behavior and Behavior Mechanisms Environment Design Neurosciences - methods Esthetics - psychology Space Perception - physiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [243]-247) and index.
Nota di contenuto	Three approaches to consciousness -- Neuroscience and the design of educational places -- Vision and light in architectural settings -- Memorials, sacred places, and memory -- Memory of places and spaces and the design of facilities for the aging -- Systems neuroscience and building systems applied to workplace design -- Methods and models for future research.
Sommario/riassunto	Brain Landscape: The Coexistence of Neuroscience and Architecture is the first book to serve as an intellectual bridge between architectural practice and neuroscience research. John P. Eberhard, founding President of the non-profit Academy of Neuroscience for Architecture, argues that increased funding, and the ability to think beyond the

norm, will lead to a better understanding of how scientific research can change how we design, illuminate, and build spaces. Inversely, he posits that by better understanding the effects that buildings and places have on us, and our mental state, the better
