

1. Record Nr.	UNINA9910743278803321
Titolo	Advances in Transboundary Aquifer Assessment
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2023
Descrizione fisica	1 online resource (346 p.)
Soggetti	Research & information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>"Advances in Transboundary Aquifer Assessment" features studies of transboundary aquifers, particularly at the border shared by Mexico and the United States, a semi-arid to arid region experiencing significant population growth and changing climate conditions. Aquifer assessment in a transboundary setting requires the cooperation of multiple jurisdictions, sometimes with different languages and cultures. The papers in this Special Issue represent a broad array of investigations of complex physical aquifer systems and related institutional settings, including identification and prioritization of needs and strategies for sustainable groundwater development and use; characterization of the physical framework of the aquifer, stressors on the aquifer system, and how those stressors influence the availability of groundwater in terms of its quantity and quality; and the incorporation of stakeholder input and prioritization directly into the process of aquifer assessment and model building.</p>

2. Record Nr.	UNINA9910953953903321
Titolo	Childhood obesity prevention in Texas : workshop summary / / Kara Nyberg, Annina Catherine Burns, and Lynn Parker, rapporteurs; Food and Nutrition Board ; Institute of Medicine of the National Academies

Sommario/riassunto	"Childhood Obesity Prevention in Texas summarizes the information gathered at a workshop held February 5-6, 2009, in Austin, Texas. At this workshop, committee members met with Texas lawmakers, public officials, and community leaders to exchange ideas and to view first-hand strategies that are being implemented effectively at the state and local levels to prevent and reverse childhood obesity. Texas leaders at the workshop expressed the strong belief that the state's economic vitality and security depend on the health of its population.

Accordingly, the state is no longer simply describing the personal, community, and financial costs of its obesity crisis; it is taking proactive steps to address the problem through strategic initiatives. An overarching strategy is to address obesity by targeting the state's youth, in whom it may be possible to instill healthy behaviors and lifestyles to last a lifetime. A guiding principle of these efforts is that they should be evidence based, community specific, sustainable, cost-effective, and supported by effective partnerships. Moreover, the goal is for the responsibility to be broadly shared by individuals, families, communities, and the public and private sectors."--Publisher's website.
