

1. Record Nr.	UNINA9910954157703321
Titolo	Assessing 21st century skills : summary of a workshop / / Judith Anderson Koenig, rapporteur, Committee on the Assessment of 21st Century Skills, Board on Testing and Assessment, Division of Behavioral and Social Sciences and Education, National Research Council of the National Academies
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 2011
ISBN	0-309-21793-8 1-283-31195-X 9786613311955 0-309-21791-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (158 p.)
Altri autori (Persone)	KoenigJudith Anderson
Disciplina	370.973
Soggetti	Education - United States Education
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""Preface""; ""Contents""; ""1 Introduction""; ""2 Assessing Cognitive Skills""; ""3 Assessing Interpersonal Skills""; ""4 Assessing Intrapersonal Skills""; ""5 Measurement Considerations""; ""6 Synthesis and Policy Implications""; ""References""; ""Appendix A: Agenda and Participants for the January Workshop""; ""Appendix B: Agenda and Participants for the May Workshop""
Sommario/riassunto	"The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively

manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning. Assessing 21st century skills provides an integrated summary of the presentations and discussions from both parts of the third workshop."--Publisher's description.
