Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Legal and translational occupations in Spain -- Effectiveness of translator certification as a signaling device -- Conference interpreting -- Occupation or profession -- Attitudes to role, status and professional identity in interpreters and translators with Chinese in Shanghai and Taipei -- Conference interpreters and their self-representation -- Habitus and self-image of native literary author-translators in diglossic societies -- The people behind the words -- Revised translations, revised identities -- Conference interpreters and their perception of culture -- Images of the court interpreter -- A professional ideology in the making -- "Boundary work" as a concept for studying professionalization processes in the interpreting field -- The task of the interpreter in the struggle of the other for empowerment -- Index.
Sommario/riassunto	This volume contributes to the emerging research on the social formation of translators and interpreters as specific occupational groups. Despite the rising academic interest in sociological perspectives in Translation Studies, relatively little research has so far been devoted to translators' social background, status struggles and

sense of self. The articles assembled here zoom in on the "groups of individuals" who perform the complex translating and/or interpreting tasks, thereby creating their own space of cultural production. Cutting across varied translatorial and geographical arenas, they reflect a view of the interrelatedness between the macro-level question of professional status and micro-level aspects of practitioners' identity. Addressing central theoretical issues relating to translators' habitus and role perception, as well as methodological challenges of using qualitative and quantitative measures, this endeavor also contributes to the critical discourse on translators' agency and ethics and to questions of reformulating their social role. The contributions to this volume were originally published in Translation and Interpreting Studies 4:2 (2009) and 5:1 (2010).

3. Record Nr.	UNINA9910739432203321
Autore	Luks Andrew M
Titolo	Introduction to cardiopulmonary exercise testing / / Andrew M. Luks, Robb W. Glenny, Thomas H. Robertson
Pubbl/distr/stampa	New York, : Springer, 2013
ISBN	1-4614-6283-5
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (150 p.)

Soggetti	Exercise tests Heart function tests Pulmonary function tests
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction to the Primer -- Glossary of Terms -- Cardiac and Respiratory Responses to Exercise in Health and Disease -- Conducting a Cardiopulmonary Exercise Test -- Interpreting Results of the Cardiopulmonary Exercise Test -- Sample Cases Demonstrating Basic Patterns of Exercise Limitation -- Self-Assessment Cases. .

Cardiopulmonary exercise testing is an important diagnostic test in pulmonary medicine and cardiology. Capable of providing significantly more information about an individual's exercise capacity than standard exercise treadmill or 6-minute walk tests, the test is used for a variety of purposes including evaluating patients with unexplained exercise limitation or dyspnea on exertion, monitoring disease progression or response to treatment, determining fitness to undergo various surgical procedures and monitoring the effects of training in highly fit athletes. Introduction to Cardiopulmonary Exercise Testing is a unique new text that is ideal for trainees. It is presented in a clear, concise and easy-to-follow manner and is capable of being read in a much shorter time than the available texts on this topic. Chapters describe the basic physiologic responses observed during sustained exercise and explain how to perform and interpret these studies. The utility of the resource is further enhanced by several sections of actual patient cases, which provide opportunities to begin developing test interpretation skills. Given the widespread use of cardiopulmonary exercise testing in clinical practice, trainees in pulmonary and critical care medicine, cardiology, sports medicine, exercise physiology, and occasionally internal medicine, will find Introduction to Cardiopulmonary Exercise Testing to be an essential and one of a kind reference.
