Sommario/riassunto	The Japanese are the only people in the world who have experienced the horror of nuclear weapons with their own flesh. Atomic holocaust was followed by American occupation and the American-inspired, postwar Japanese 'Peace Constitution' which explicitly outlawed Japanese military forces and the use of war as an instrument of state policy. At the time of original publication the author argued that

contemporary forces within Japan were combining to create a strong movement for revision of the constitution and for the acquisition of nuclear weapons by renewed and powerful military establishmen
