Sommario/riassunto	Integrating Neuropsychological and Psychological Assessments is a resource for neuropsychologists, psychologists, teachers and parents who wish to address both the neurologically- and emotionally-based difficulties with which their children are presenting. In addition to a

thorough description of neuropsychological and psychological assessment tools, this book also provides professionals with a unified approach to using the results from assessments to understand and integrate cognitive, behavioral, social and emotional functioning in school-age children. It posits that to educate a
